ANDlight, decorative luminaire design and manufacturer.

——

Born from a desire to produce functional lighting, luminaire design and manufacturer ANDlight aims to create honest products. With an authentic approach to the design process, the production, and the way of conducting business, ANDlight has established itself as a brand with substance since its launch in 2014. It proposes approachable products that are timeless in form and reliability, refined in aesthetics, with an astutely applied touch of playfulness.

ANDlight's luminaires are designed, built and assembled in their native Vancouver, Canada.

COLLECTION OVERVIEW

The inherent versatility of ANDlight's designs allows for surprising yet refined variations in form, finish and material; fulfilling a wide range of applications.

VALE optimises functionality through its multidirectional luminescence while diffusing soft ambient light.
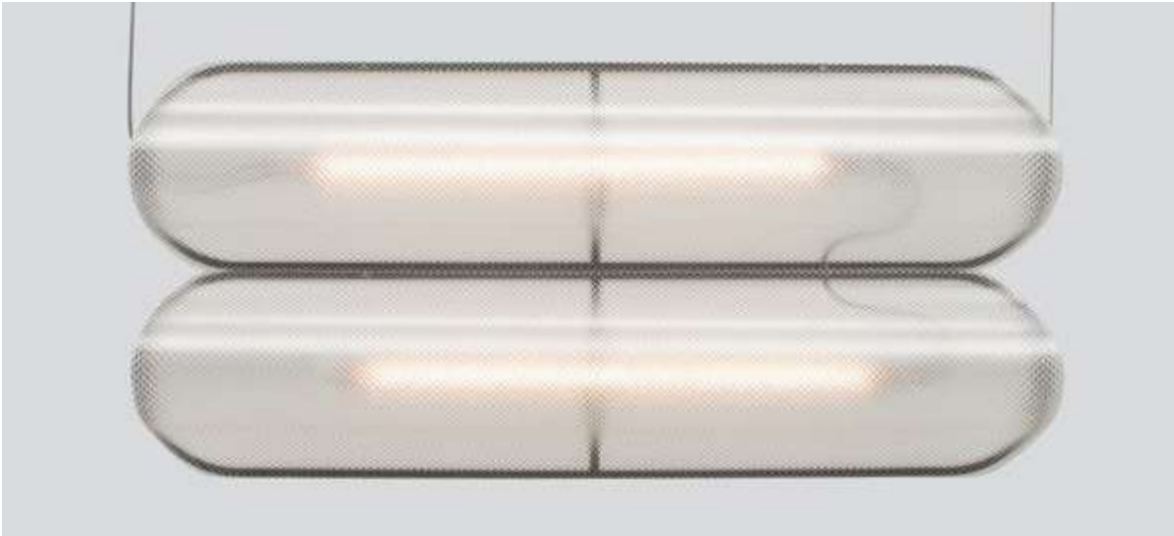

PIPELINE is the quintessential modular light fixture as its components enable it to match the contours of any given space.

SPOTLIGHT is based on four unique shade profiles creating various silhouettes and control over down and uplight.

SLAB's acoustic properties reduce ambient noise while its distinctive aesthetics stand out.

VINE combines exaggerated form with repetition to take center stage with poise and stature.

PIVOT is playful and interactive as its balancing shade allows for easy adjustments.

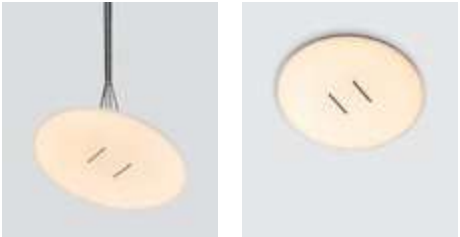

PEBBLE celebrates the beautiful qualities of stones while enabling the individual to extract their own collection.

ORBIT illustrates the planetary manoeuvre with its lines defining space around a glowing sphere.

BUTTON boldly plays with the archetype, as its wide luminescent surface adjusts and hangs from its threaded rope.

The Pebble series celebrates the inexplicable and beautiful qualities of stones. Enhancing their simple yet sculptural form through translucency, two glass blown shapes come together entering a dialogue. The result is a seemingly bespoke pendant fixture— endlessly evolving in shape as it appears from different angles. The pendant features a combination of a large and small glass blown form, each with four possibilities for finishes, allowing the individual to extract their personal collection.

"The inspiration for the series was the inherent beauty of river rocks—seemingly simple, the actual complexity of their form is the result of thousands of years of sculpting by nature. Glass blowing was an interesting process to utilize for this idea, as it enables for manipulation of the material. I wanted to allow these primordial shapes to glow— adding to their profoundness and giving them a soul."

Vale

The Vale series crystallises light in its transitional state. The undulating profile of the lens translates emitted light to a striking gradient; while its prismatic surface further carries light across, creating a soft hue and ambient diffusion. Technically intricate, Vale optimises functionality through its multidirectional luminescence.

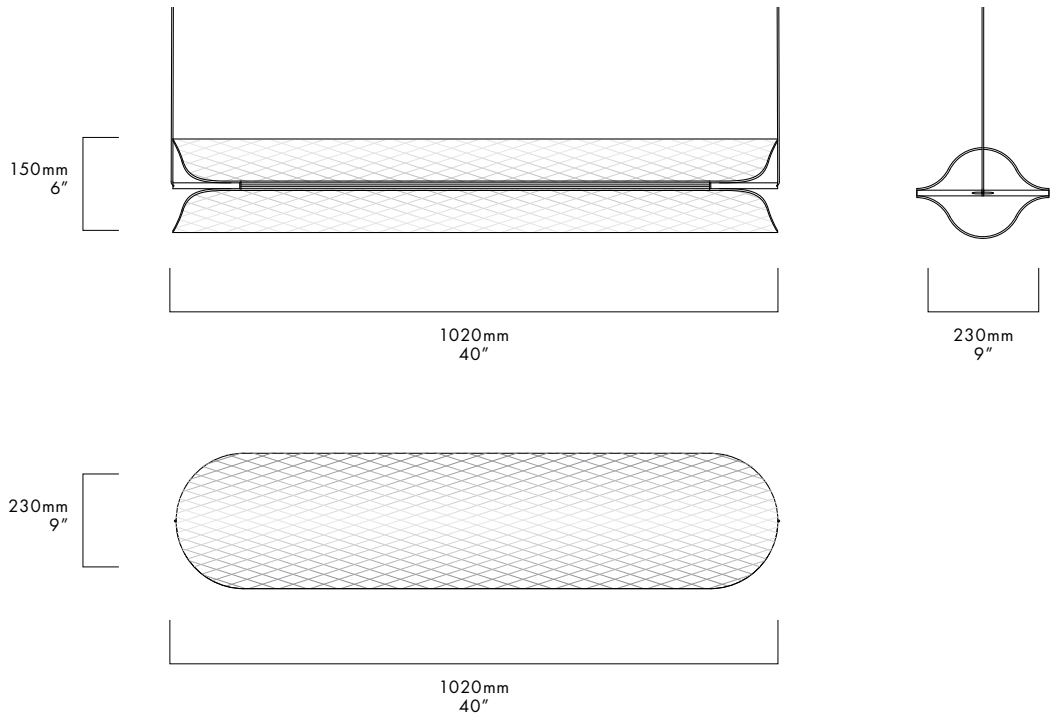

VALE – PENDANT
ANTHRACITE

"Dynamism, created by juxtaposing light with a wave-like contour fuelled the initial research. Exploring scale, pitch and frequency and various materials helped settle for the most effective and interesting radiance. Focused specifically on the lens of the luminaire—the process development determined form and functionality as it needed to be lightweight and translucent, yet able to create volume."

INTERIOR
METAPHORE DESIGN

PHOTO
DAVID BOYER

The original light source, the sun, is the initial inspiration of all man-made lighting, hence glowing globes being iconic in lighting design. The Orbit series draws direct inspiration using an opalescent glass globe, giving a nod to our main star. Taking central stage, a glowing sphere is then enclosed in a wire cage evocative of the familiar planetary manoeuvre.
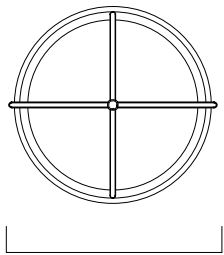

ORBIT – PENDANTS
BLACK

ORBIT – PENDANTS
BLACK

"The glowing globe is iconic in lighting. So simple and effective, it of course resembles the original light source—the sun. Orbit is a direct response to this, with its metal cage functionally protecting the glass as well as referring back to the sun and our own orbit around it."
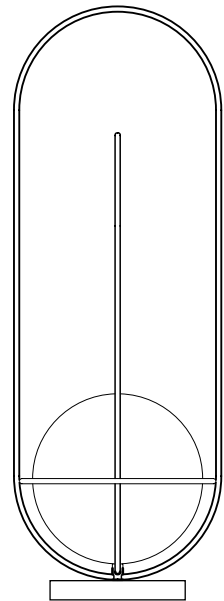

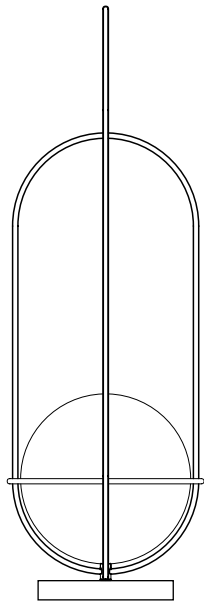

—LUKAS PEET

PIPELINE 125.3 – PENDANT
WHITE

DESIGNER
CAINE
HEINTZMAN

Pipeline

The Pipeline series begins with a linear LED light, elegant in its simplicity; however what sets it apart is the ability to expand the scale of the fixture by multiplying the modular pendant, creating an infinite range of tailored lights.

The Pipeline series may be suspended horizontally level or at angles, individually or in multiples.
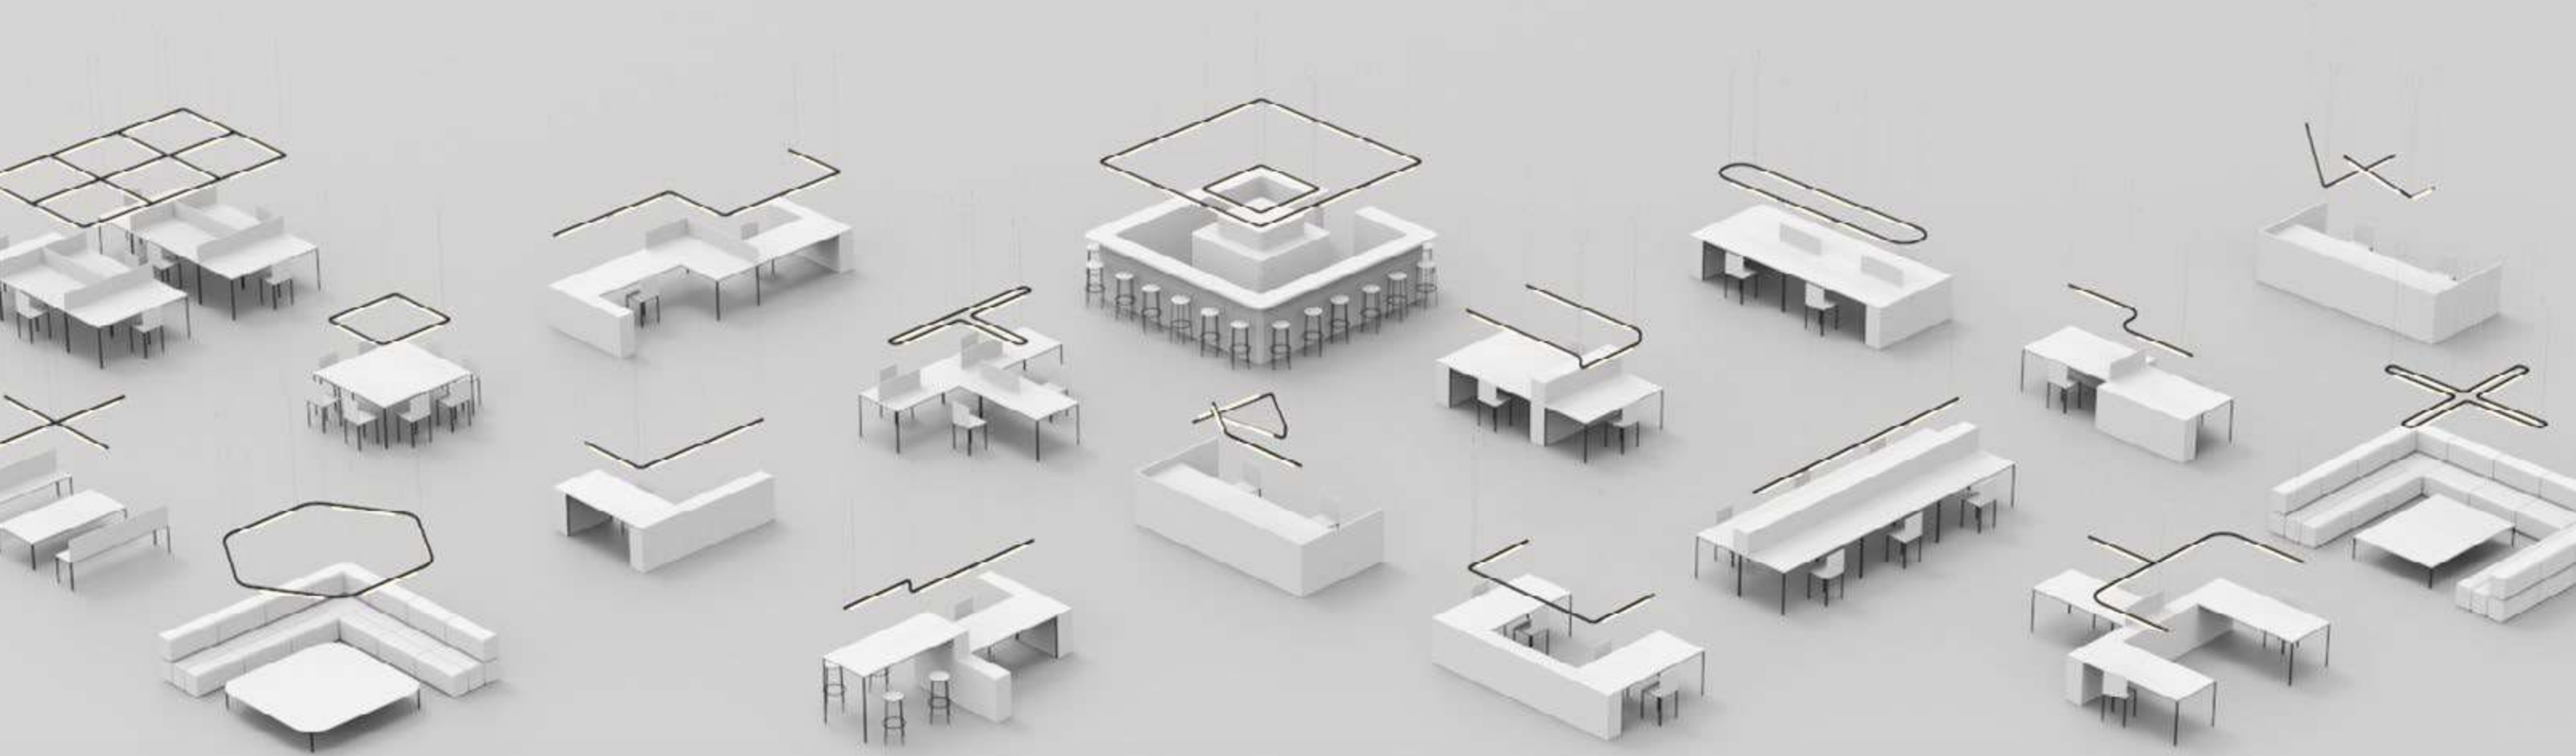

PIPELINE SYSTEM

The Pipeline starts with two standard illuminated lengths— the 40 and the 125—and can be further customized into a variety of configurations.

PIPELINE 40, 125 – PENDANT
BLACK

PIPELINE SYSTEM

The ingenuity of the components enable the Pipeline to adapt to any interior space.

LINEAR SERIES
Two section sizes act as single modules or connect to multiply in space.

PIPELINE 40   **PIPELINE** 125   **PIPELINE** 125.2

TABLE/FLOOR
Upright, the table and floor variations series redirect light and purpose; while the chrome mirror weighted base enhances the sleek profile.

CEILING/WALL
Space efficient, the surface mounted Pipeline provides accent lighting while becoming an integral element of the environment it is set in.

Inspired by spotlights, the Spotlight Volumes series is based on four unique shade profiles which combine in various ways. Designed with a modern silhouette, the inspiration is based on a classic shape, giving a timeless air to the fixture. The pendant version features a conventional down light as well as an unconventional uplight, offering multidirectional illumination.

"I wanted to expand on the strong silhouette and character of the Spotlight Volumes series of pendants, ceilings and table lights. The elongated proportions of the base combined with any of the four top shades give it architectural stature, thus resulting in a dimmable uplight floor lamp. The adaptation of the concept to a floor lamp came as a logical extension to the series; as versatility remains one of the key focuses of the development."
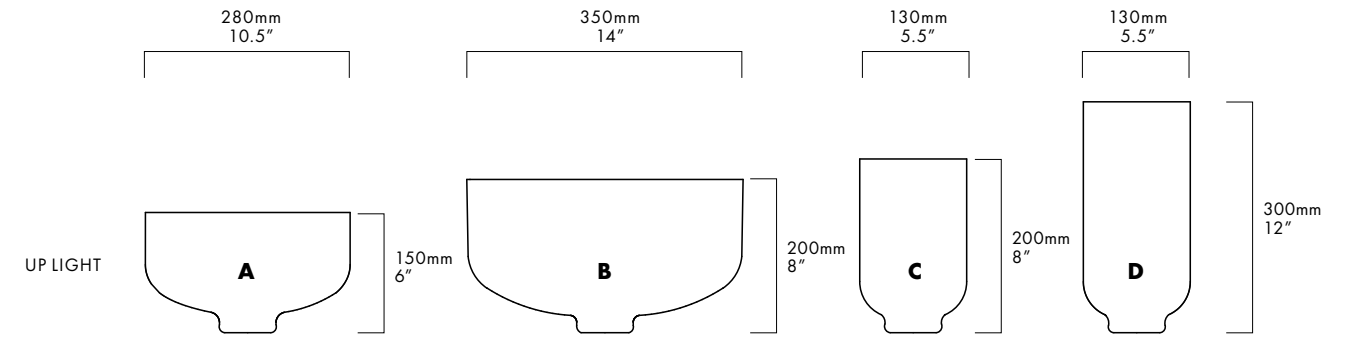

—LUKAS PEET

The Vine series introduces exaggerated form with propensity for repetition resulting in a bold impact. Composed of a poised chrome arc flanked by two glowing glass globes— the multiplication of the module enables the fixture to grow low, exponentially overstating the fixture's overall silhouette.

"Vine addresses the need for a fixture of scale, radiance, and exuberance. Efficient LED lamps are amplified by opal glass in repetition, which help generate a very big fixture from very little electricity and just a few simple components."
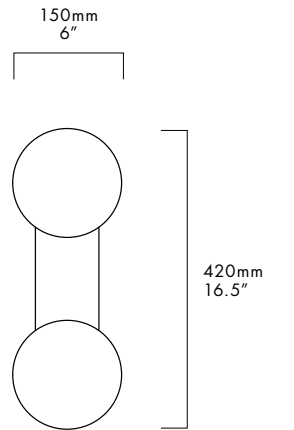

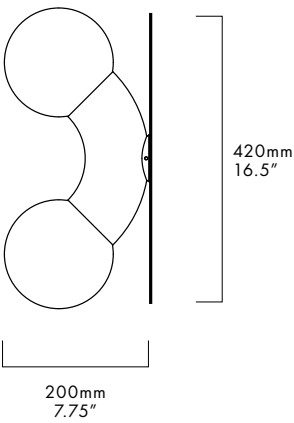

—CAINE HEINTZMAN
